

Why not work in Lower-Saxony and Bremen?!

From the North Sea Islands to the beautiful rolling Harz hills Lower-Saxony and Bremen has it all! We offer the lively city life of Hanover and Bremen, but also the convenient for escaping to the peace and quiet of our idyllic countryside.

Lower-Saxony and Bremen are federal centres of academic excellence and scientific innovation. For learning German, as a second language, our region does not only offer high standards of language teaching but also the opportunity to benefit from an accent neutral environment. What you hear in class is what you will hear in the community. Global enterprises and dynamic and successful small and mid-size companies significantly contribute to the core of the German economy (www.lower-saxony.de).

The International Placement Services (ZAV) are a member of the European Employment Services network EURES - we place our services at your disposal free of charge!

For an Employer, we are looking for a

quality engineer, mechanical engineer (m/F)

in the region of Lower Saxony

Responsibilities:

- Continuous collection and statistical processing of data from our production processes, control methods and our products in order to identify potential for improvement and documentation.
- Participation in product examinations regarding SCAR (Supplier Corrective Action Request), internal CAPA (Corrective and Preventive Action) as well as customer complaints and the resulting measures to be taken.
- Close cooperation with manufacturing for process optimization measures.
- Planning and implementing qualifications and validations of production processes and control methods.
- Preparing and conducting internal and external audits.
- Communicating with customers and suppliers with regard to quality and handling of complaints.
