

ELV Project Engineer

Number of Positions: 1

Contract Type: Indefinite

Job description

- Assist in the design of the company's engineering solutions, ensuring compliance with relevant standards and regulations, such as local electrical codes, safety regulations, and industry best practices.
- Participate in the project coordination, from initial design to final installation. This includes liaising with clients, contractors, suppliers and installers, overseeing budgets, and ensuring projects are completed on time.
- Coordinate with other engineering disciplines to ensure our systems integration and compatibility with other building systems (HVAC, lighting etc).
- Supervise on site installation, testing, and commissioning of electrical systems, ensuring proper functionality and safety.
- Assist in creating and maintaining technical documentation, including schematics, wiring diagrams, and system specifications.
- Contribute to project planning and execution by reviewing proposals and plans in coordination with clients, client representatives, and contractors.

Here is what you need to excel in this post:

- Be in possession of a Bachelor's Degree in Electrical/Electronics Engineering
- Have two years' work experience in electrical engineering
- Enjoy both site work and office-based tasks
- Be smart, highly motivated and able to work on your own initiative;
- Have good written and verbal skills in English, Maltese is a plus;
- Hold a valid driving licence
