

GAME SERVER DEVELOPER

Number of Positions: 1

Contract Type: Indefinite

Our Game Server Developer is responsible for building and maintaining the server-side infrastructure that powers online games for Lady Luck Games. We are expanding this team and are looking for an additional Game Server Developer who will focus on creating reliable, scalable, and secure backend systems that support real-time gaming functions, player interactions, and data management.

Job description

The Game Server Developer works closely with our game designers, front-end developers, and system administrators to integrate game mechanics, process data, and ensure smooth connectivity between clients and servers. They often optimize performance, monitor server health, and ensure compliance with industry regulations to deliver a seamless gaming experience.

Requirements

- Experience: Minimum of 3 years
- Bachelor's degree
- iGaming experience

Training provided

Mainly on the job training or additional training as identified when the candidate starts

Any assistance with accommodation/relocation

2 weeks paid accommodation + flight arrangements. We will also support with relocation (questions, connections etc).

Salary

€ 50,000 - € 60,000 (depends on experience)
